MEMORANDUM FOR: Chief, Plans and Development Staff, NPIC
THROUGH: Chief, Production Services Division, NPIC
SUBJECT: Film Storage

MB

1. Request a study for possible development of a unitized, room size, film storage unit to alleviate problems in film storage and handling. This unit, designed to hold cans of rolled film in an atmosphere of controlled temperature and humidity, would feature and electronically operated loading and dispensing capability.

2. The unit would be constructed without requirements for working aisles, since the film cans could be loaded and retrieved at one access point. It is envisioned that the unit through its internal mechanisms would store the film at present locations. To retrieve film, the film control number would be dialed into the control mechanism which would address and recall the stored film from its location, depositing it at the access point.

3. If the development cost is not prohibitive, a savings in operating personnel and space could be realized by NPIC and other agencies who are faced with this problem.
